

# Cherrywood Place, Coventry

**9 x 2 bed houses**  
**6 x 3 bed houses**  
**2 x 4 bed houses**

This scheme was built by Taylor Wimpey on the former site of Dunlop Systems and Components on Beake Avenue.

The location of the site and mix of dwellings enhances the existing local stock.

These modern and energy efficient homes have provided affordable housing to local residents with the opportunity to move to properties that meet their changing family needs.

There was a phased programme of handovers from January 2016 with the final three units handing over on 18<sup>th</sup> June 2016.
